### Product Description:

Hot Shot is a premium quality, concentrated extractor shampoo. It is specifically formulated for use in cold and hot carpet extractors and Tornador type cleaners.

Hot Shot is formulated with specific ingredients such as corrosion and scale inhibitors, and without solvents. Corrosion and scale inhibitors are used to prohibit the growth of scale that often develops in the pumps and heat units of extractors. Unlike competitive products, Hot Shot will actually keep your heater and pumps free and clear from corrosion and scale build-up.

Hot Shot does not contain any solvents or VOCs. These products will often be used to help clean dirty carpets, but Hot Shot does not use them because they will attack the pump seals, reducing the life of extractor pumps.

Also, Hot Shot only uses "dry foam" technology. That means the carpets will not have any sticky residue and will leave the carpets soft and fluffy.

Hot Shot is highly concentrated. Only 8 oz of hot shot to a 5 gallon reservoir tank is needed to clean even the dirtiest carpets.

### Advantages:

- ◆ Dry Foam Technology
- ◆ No Solvents
- ◆ Environmentally Safe
- ◆ ZeroVOC formula
- ◆ Biodegradable
- ◆ Inhibits scale build-up to heater & pump
- ◆ Concentrated.
- ◆ Complies to EPA Designed for the Environment regulations.

### Part Numbers:

- ◆ 1 gallon bottle # 15-104
- ◆ 5 gallon tighthead # 15-105
- ◆ 55 gallon plastic drum # 15-108

### Directions:

1. Dilute 8 oz of Hot Shot into 5 gallon extractor tank or dilute 60 to 1 for Tornador use.
2. Spray onto carpets using equipment. For extractors, use one application pass and two vacuum passes. For the Tornador, just spray onto carpets in an overlapping motion. Then vacuum with a wet & dry vacuum.
3. Allow to dry.
