Product Description:

For all tanned leather goods.

From leather seats and luggage to jackets and handbags, HYDE will protect new leather and restore older, worn leather to their original lustre and suppleness.

HYDE contains natural oils to replenish leather. It will penetrate the leather and restore moisture and flexibility to the leather. It leaves a natural, non-greasy finish on the leather. It makes the leather look new rather than creating a phony shine.

Use HYDE as if applying lotion to your hands. If you use too little, the product will suck into the leather and not spread. Just apply more product as needed. If you use too much, it will be too greasy. If that is the case, just spread the product over a larger area. Remove any residue with a microfiber cloth.

Advantages:

- ◆ Repels water stains
- ◆ Protects leather from wear
- ◆ Water-based formula
- ◆ Product contains zero VOCs
- ◆ Safe on all types of natural leather
- ◆ Easy to use and effective
- ◆ Exceeds all State and Federal regulations

Part Numbers:

- ◆ 16 oz (Pint) # 13-192
- ◆ 32 oz (Quart) #13-193
- ◆ 1 gallon # 13-194

Directions:

1. Clean leather using Vinyl & Leather Shampoo to remove heavy dirt and grime from the surface.
2. Apply HYDE to an applicator and rub into leather using circular motions. Allow HYDE to absorb into the leather.
3. Allow to dry.
4. Remove any excess product with a damp microfiber towel.
