#### Product Description:

Mag V utilizes a strong blend of acids, surfactants and corrosion inhibitor buffering agents.

It is used by auto dealers, car washes, & professional detailers to clean:

Coated aluminum rims  
Chrome wheels & bumpers

Caution should be used when cleaning uncoated metal rims. Mag V will act as an aluminum brightener. It will clean the metal well, but leave it with an etched surface. Mag V will remove any high shine polish on raw metal surfaces.

In addition, Mag V can be used at truck wash facilities as an aluminum brightener. It will remove grease, grime and traffic film while “brightening” the aluminum surfaces.

Nothing cleans chrome and metal surfaces like an acid-based product. It will work quickly and efficiently. However caution should be taken when using any acid based product. Follow product directions and wear the appropriate protective clothing.

#### Advantages:

- ◆ Acid-based cleaner
- ◆ Quickly removes brake dust
- ◆ Safe for painted or coated rims
- ◆ Biodegradable
- ◆ Rinses Clean
- ◆ Works as an aluminum brightener

#### Part Numbers:

- ◆ 16 oz. (pint) # 24-112
- ◆ 32 oz (quart) # 24-113
- ◆ 1 gallon bottle # 24-114
- ◆ 5 gallon tighthead # 24-115

#### Directions:

1. Always clean one wheel at a time. Surface should be cool to the touch before cleaning.
2. Spray product onto wheel. Allow product to coat the wheel and dwell for 30 seconds to 1 minute.
3. Agitate with a soft brush.
4. Rinse with water.
5. Move onto next wheel.
