#### Product Description:

Qwik Kut MV-250 is a fast cutting compound for use in detailing shops and body shops. It is an excellent fast cut compound that buffs clean and has easy clean-up properties.

Qwik Kut MV-250 utilizes large and medium hardness abrasives. The unique qualities give the product fast initial cut and then, under the heat and friction, the abrasives break-down into polish mode and provide an excellent finish.

For Body Shops, Qwik Kut MV-250 will quickly remove sanding scratches up 1200 grit then polish out to a beautiful finish. Qwik Kut MV-250 can be used with any type of wool or foam pad to achieve the necessary cut & polish desired.

For detailers, Qwik Kut MV-250 quickly removes oxidation, heavy scratches, etc. Again, it can be used with wool or foam pads to achieve the desired cut/polish properties.

It is excellent for use on paint, fiberglass & gelcoat surfaces. It easily removes heavy oxidation from fiberglass & gelcoat when used with a high speed polisher and wool pad.

#### Advantages:

- ◆ Fast cut formula
- ◆ Body Shop Safe
- ◆ Easy clean-up
- ◆ Heat induced abrasives break down to polish surface.
- ◆ Use on paint, fiberglass & gelcoat
- ◆ Works in all types of weather

#### Part Numbers:

- ◆ 32 oz. # 22-803
- ◆ 1 gallon bottle # 22-804

#### Directions:

##### By Machine:

1. Surface should be clean and cool to the touch
2. Set polisher to 1200 - 2000 rpm with a wool or foam pad depending on cut you desire.
3. Apply a small amount of product to paint and spread over a 2' x 2' area. Try to keep pad flat at all times.
4. Buff evenly, using overlapping motions, until product is almost all gone.
5. Remove residue with a microfiber towel. Continue to next section.
