### Product Description:

Splash is a thickened acid product used to remove waterspots from paint, glass and chrome. It is a buffered blend that actually dissolves water spots and rinses them away.

Splash is just thick enough not to run off of the surface of the paint or glass but slowly coat and cling to the surface.

This product has been tested and recommended by Honda for use on its vehicles.

When using Splash to remove water spots, rubbing is not required. Allow the product to dwell on the surface, but do not allow it to dry.

Splash can be used on cars, mirrors, paint, motor homes, office buildings, boats, airplanes, shower doors, etc.

**Caution:** Splash may accentuate any pitting that may be present on used windshields. We do not recommend using Splash on older windshields!

- When removing water spots, Do not spray on. Apply with a soft cloth or sponge.
- Make sure surfaces are cool to the touch before applying.
- Always work from the bottom towards the top to avoid streaks.
- Always wear an apron, gloves and goggles.
- Do not use Splash on side view mirrors. If Splash gets behind the mirror, it may cause noticeable streaking.

### Advantages:

- ◆ Easily dissolves water spots / mineral deposits
- ◆ Fast and easy to use
- ◆ Safe for paint, chrome and plastic surfaces
- ◆ Recommended by American Honda
- ◆ Thickened formula prevents running
- ◆ Also removes cement splatter from surfaces
- ◆ Zero VOC formula

### Part Numbers:

- ◆ Quart bottle # 1-553
- ◆ 1 gallon bottle # 19-554
- ◆ 5 gallon tighthead # 19-555
- ◆ 55 gallon plastic drum # 19-558

### Directions:

1. Surface should be cool to the touch.
2. Apply Splash to a 2' x 2' area with a soft sponge or cloth.
3. Continually move product to allow the product to dissolve the mineral deposits.
4. Do not allow product to dry.
5. When surface is smooth and spots are removed, rinse with water.
6. Move onto next 2' x 2' section.
